Re: Weekly Progress Report
7825 San Leandro Street
Oakland, California
Site Cleanup Program Case Number: RO0003535
GeoTracker Global ID: T10000019792

Dear Dilan:

INTRODUCTION

Roux Associates, Inc. (Roux), on behalf of Duke Realty Foundry LP, has prepared this Weekly Progress Report (Weekly Report) as set forth in the Final Community Air Monitoring Plan (Final CAMP) (Roux, 2023) prepared in support of vertical demolition activities at 7825 San Leandro Street in Oakland, California (Site). The Final CAMP was conditionally approved via email by the Alameda County Department of Environmental Health (ACDEH) on August 24, 2023¹. This Weekly Report provides a summary of the perimeter air monitoring program conducted during demolition work at the Site from September 11 through 15, 2023. It is anticipated that demolition work will be completed in the first quarter of 2024.

The Final CAMP describes the necessary monitoring activities and control measures to be implemented for dust mitigation during vertical demolition. The Final CAMP was prepared in accordance with the Community Air Monitoring Plan Guidance (CAMP Guidance) prepared by the California Environmental Protection Agency (CalEPA) and the California Department of Toxic Substances Control (DTSC) dated January 2020 (CalEPA/DTSC, 2020). The Final CAMP incorporated changes to the scope of work requested by the ACDEH in directive letters issued on July 13, 2023, and August 23, 2023. The monitoring activities and control measures presented in the Final CAMP comply with applicable regulations and are protective of off-Site populations and on-Site construction workers.

The ACDEH Local Oversight Program (LOP) for Hazardous Materials Releases is the lead regulatory agency for the Site. Environmental investigations and clean-up actions at the Site are being undertaken under the oversight of that agency Site Clean-up Program (SCP), with GeoTracker Global ID T10000019792 and ACDEH Case Number RO0003535.

Site Description

The Site is located at 7741, 7825, and 7929 San Leandro Street in Oakland, California. For simplicity and consistency with regulatory communication, 7825 San Leandro Street will be used to reference the

¹ Andrew York. 2023. Email reply to "ACDEH Correspondence - Cleanup Site Program Case No RO0003535 - AB&I Redevelopment - Directive Letter", August 24, 2023, 2:15 p.m.

location. The Site consists of approximately 14.5 acres and is currently developed with a two-story office building, multiple warehouses, a foundry and manufacturing building, material storage, and a parking lot. The Site is bounded by commercial/industrial properties to the north, south, east, and west. Union Pacific Railroad is located to the west, Oakland Truck Stop to the east, Elmhurst Creek along the southeast property corner, and San Leandro Bay is approximately one mile to the west. The nearest residential areas are approximately 1,500 feet north and east of the Site.

SITE BOUNDARY MONITORING

This Section describes the air monitoring program that was implemented at the Site from September 11 through 15, 2023 during demolition activities. Monitoring described in this section was conducted using field equipment that allowed for real-time monitoring of PM10 and meteorological conditions. Monitoring at the Site boundary consisted of the following activities in six air monitoring stations (AMS-01 through AMS-06) as shown on Figure 1:

- Dust monitoring for PM10; and
- Weather station monitoring for wind speed and direction.

Particulate Matter Monitoring

Airborne particulate matter (PM) is a complex mixture of particles that vary widely in size, shape, and chemical composition. Particles with a diameter of 10 microns or less (PM10) are particles small enough to pass through the throat and nose and enter the lungs. PM10 can be comprised of smoke, soot, salts, acids, metals, and dust, including wind-blown dust (CARB, 2023).

Measurements of real-time and 8-hour time-weighted averages (TWA) of airborne particulate concentrations were recorded daily during demolition work hours (generally from 7:00 am to 3:30 pm) using TSI DustTrak II Aerosol Monitors at sampling locations AMS-01 through AMS-06 (Appendix A).

During this weekly monitoring period, dust monitoring measurements ranged from 1 to 1,050 micrograms per cubic meter ($\mu\text{g}/\text{m}^3$). Daily time-weighted averages of PM10 measurements were calculated by Roux and are summarized in Table 1.

During the weekly monitoring period, there were no exceedances of the California Ambient Air Quality Standard (CAAQS) for PM10 adopted by BAAQMD, which specifies a ceiling level of no more than 50 $\mu\text{g}/\text{m}^3$ difference between upwind and downwind sampling locations over the course of the day.

Weather Station Monitoring

A meteorological station was placed proximate to upwind location AMS-01 because its location was free from obstruction and representative of wind patterns present at the Site (see Figure 1). Measurements of wind speed, peak wind gust, direction, ambient temperature, relative humidity, and barometric pressure were recorded every minute during the demolition work period (generally from 7:00 am to 3:30 pm) using a Lufft WS500 Weather Station (Appendix A).

Roux prepared a wind rose diagram based on meteorological data collected during the weekly monitoring period (see Figure 2). As shown in the wind rose diagram, the prevailing wind direction was out of the west-northwest with wind speed ranging from 1.6 to 14.8 miles per hour (mph).

During the weekly monitoring period, there were no exceedances of the maximum wind speed (greater than 25 mph) nor 15-minute average wind speed (greater than 20 mph) action levels.

Air Sampling for Laboratory Analysis

Lead in air sampling was not performed during this weekly monitoring period because demolition of the cupola and associated baghouses has not begun. In accordance with the August 23, 2023, directive letter, Roux toxicologists are currently preparing a Human Health Risk Assessment (HHRA) to evaluate potential risk from short-term exposure to lead adhered to particulate matter.

Dust Control Measures

The demolition contractor, Garrison Demolition Engineering (Garrison), continuously applied water to their work area and structures being demolished throughout the workday in accordance with dust control measures outlined in the Final CAMP.

Demolition Work Performed and Planned for Upcoming Week

From September 11 through 15, 2023, Garrison performed the following activities:

- Demolition of the former Special Finishing Area, catwalk along the northwest and southeast portions of the main building, and former main building and baghouses.
- Trucking/off-haul of stockpiled demolition debris.

Upcoming work activities will include the following:

- Continued demolition of the former main facility and buildings in the vicinity.
- Continued trucking/off-haul of stockpiled demolition debris.

CONCLUSIONS

During the period from September 11 through 15, 2023, Roux conducted a demolition air monitoring program to evaluate PM10 and meteorological conditions (wind speed, direction, temperature, humidity, etc.). As demonstrated during the baseline monitoring period (Roux, 2023b), the results indicate that PM10 levels vary significantly depending on several factors (i.e., weather conditions, the natural environment, and human activities) and ranged from 1 to 1,050 $\mu\text{g}/\text{m}^3$ during the weekly monitoring period. Meteorological data confirmed the prevailing wind direction from the west/northwest.

During the weekly monitoring period, there were no exceedances of the CAAQS action level for PM10, 15-minute average wind speed action level, nor maximum wind speed action level.

Max = Maximum

TWA = Daily Time Weighted Average

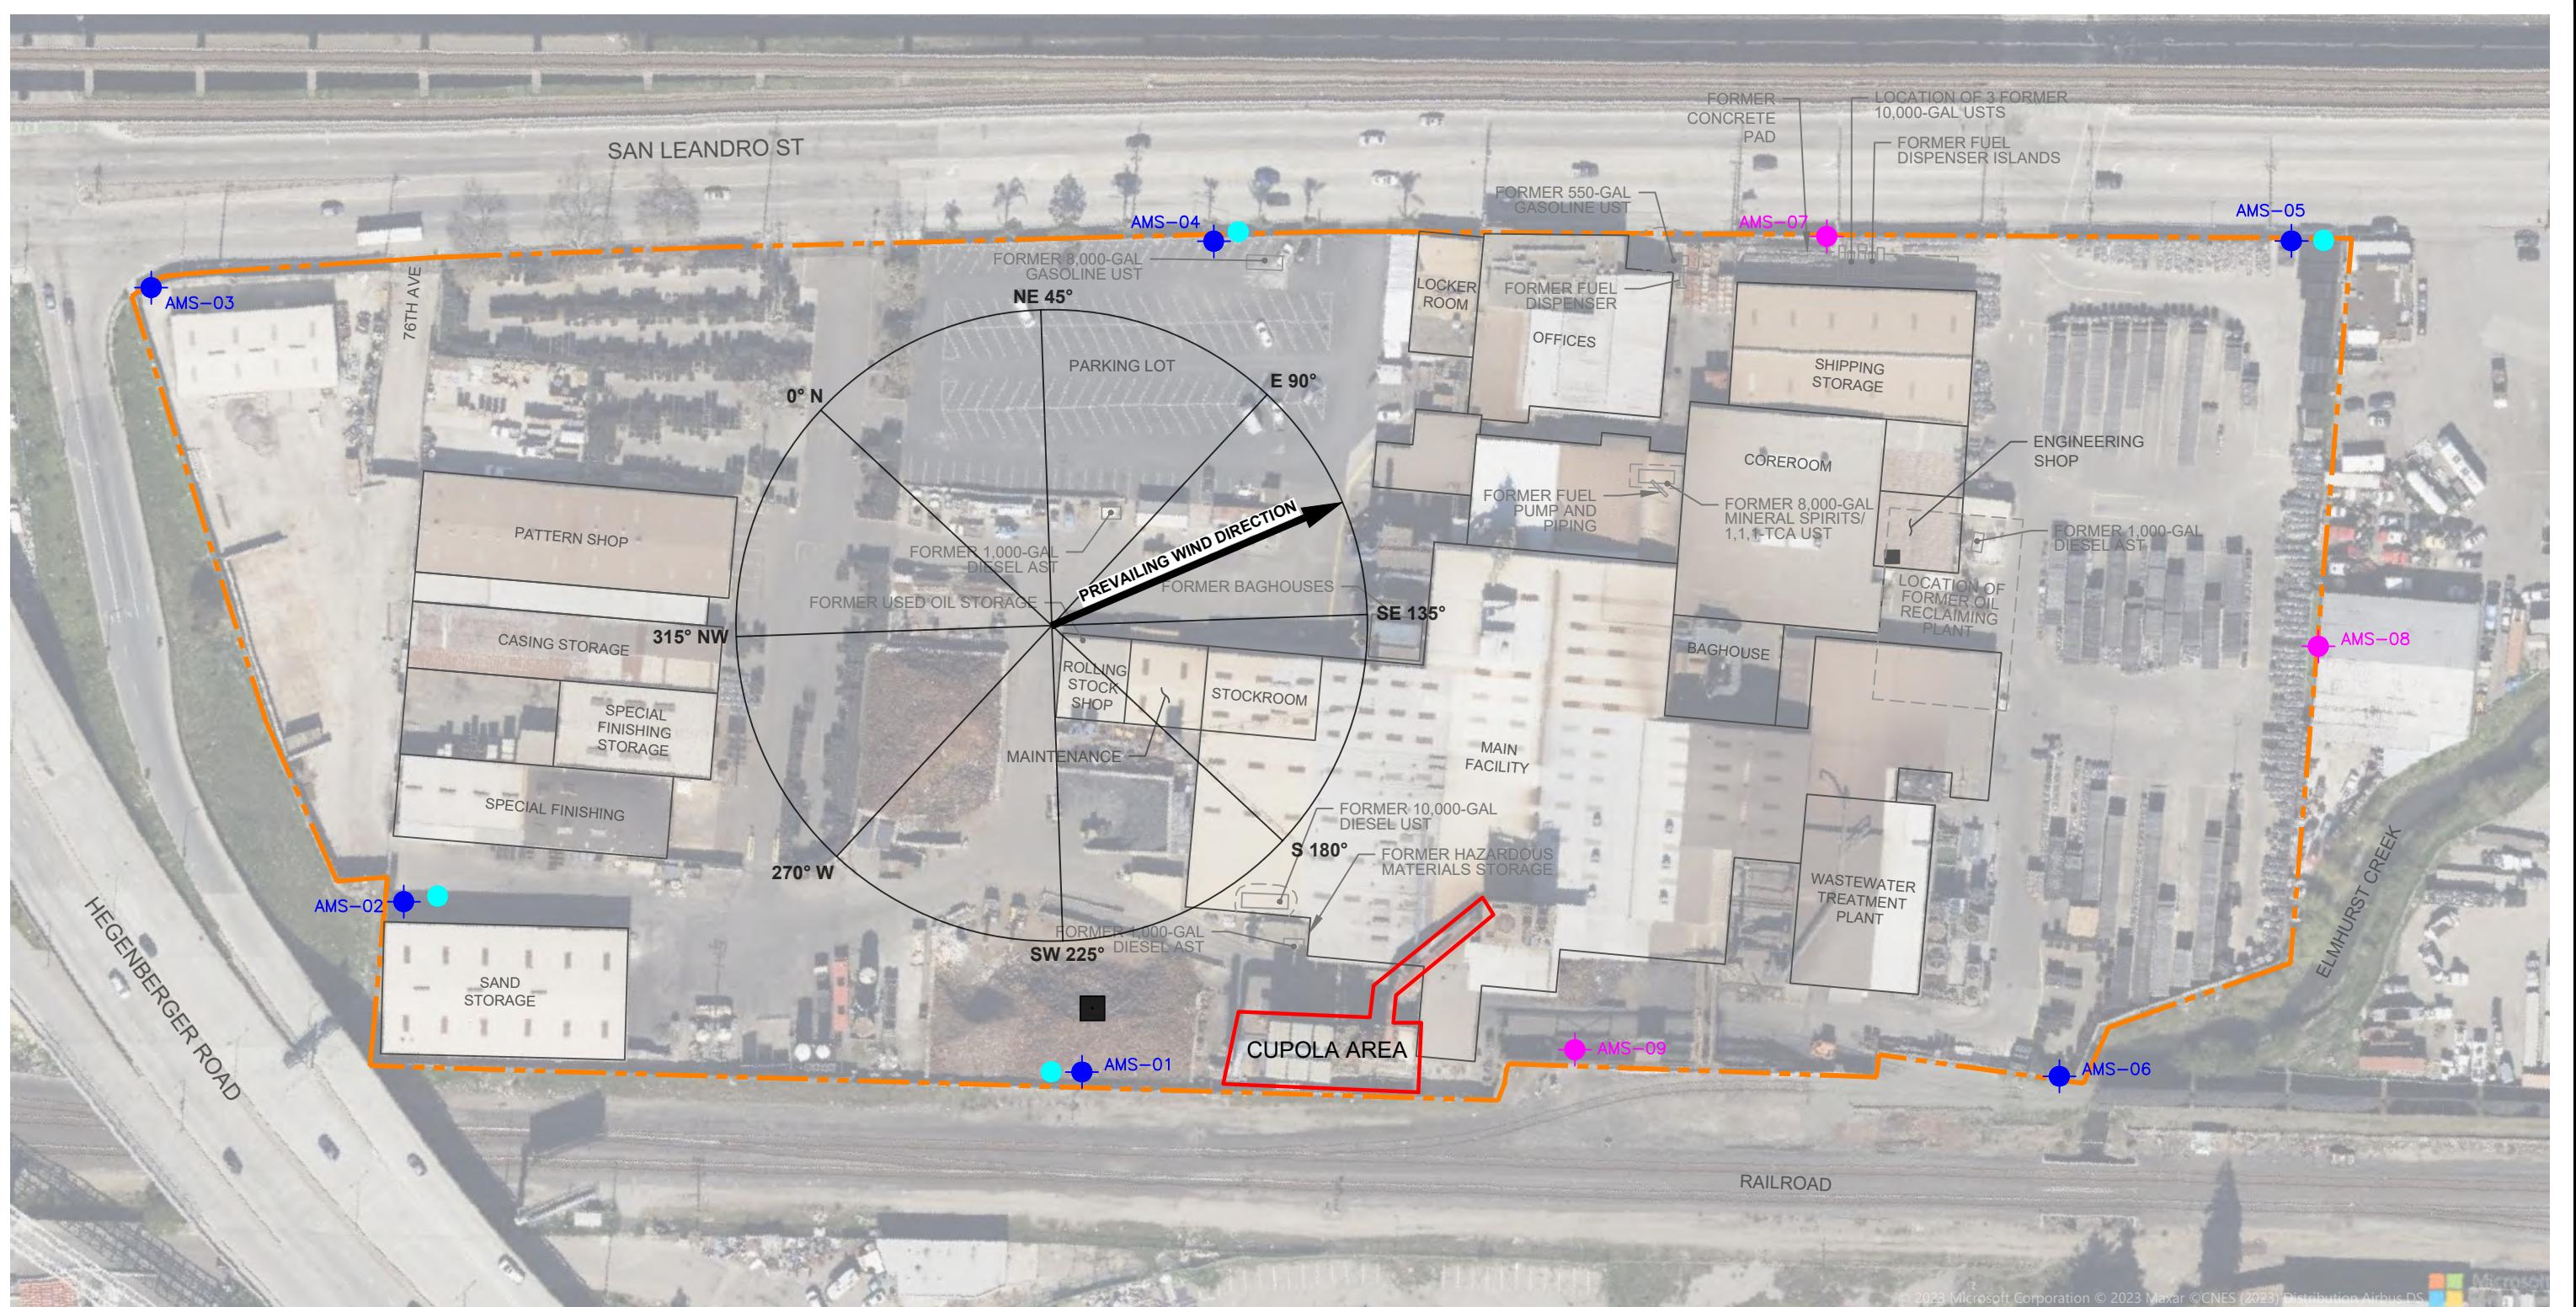

¹ Samples collected during demolition period from 7:00 am to 3:30 pm.

² During a one-minute interval on 9/12/2023 at 1:54 pm, a PM10 reading of 1,050 was measured because excavation equipment exhaust was in close proximity to the dust monitor intake.

Weekly Progress Report
7825 San Leandro Street, Oakland, California

APPENDIX B

Daily Progress Reports and Activity Logs

CAMP ACTIVITY LOG

Client Name:	Prologis	Weather:
Job/Site Name:	Former AB&I Foundry	
Location:	7825 San Leandro Street Oakland, CA	
Project Number:	1793.0029S000	
Date:	09/11/2013	
Field Staff:	Jessica Gutierrez - Batt Biologist (JA) Julie Garrison - Batt Scientist (JC)	Wind direction: NE at start of day.
Time	Activity/Comments (i.e., Wind direction, dust readings, exceedances, response actions, mitigation, etc.)	
0600	- JA + JC meet onsite. JA reads H&E Tailgate, discuss scope and hazards on site. - Begin to set up all air monitoring stations (AMS), total of 6.	
0640	- Garrison demo crew begin to water site.	
0721	- AMS set up complete. JA + JC check in with foreman on site for Garrison, Rolando, JC + Rolando exchange contact information, JB has walkie talkie in case he needs to reach Rolando or the superintendent Alberto. - JA + JC call Harold Rush (project manager - PR) to check in.	
0741	- change low battery at AMS-04. - AMS-03 appears to come on and off-line, checked it and it appears to be running fine with readings < 50 $\mu\text{g}/\text{m}^3$ (readings were at around 100 $\mu\text{g}/\text{m}^3$ when first set up and no activity but nothing was going on onsite) - Demo activity on site and going on by upwind area + cutting storage areas. Garrison crew actively watering on site.	
0800	- AMS-04 battery voltage still reading low at 7.5 Volts. checked all wires + fuses, looked like they are in good shape, all connections are good. swapped out battery 3x. JA calls Environmental conditions, readings for batteries running as low at 6.7 volts. Environmental suggests we swap this moment AMS-04 battery with another station's and then see what the readings for the battery look like at another station.	
0820	- JA + JC swap battery at AMS-06 with AMS-04 battery. AMS-05 battery reading at 12.7 volts. - JA calls Environmental after replacing AMS-04 battery with the good AMS-05 battery. Environmental says Tyler will look into the problem and get back to JA.	
0850	- AMS-04 Battery issue resolved, reading 12.4v. - JA offsite to get to pick-up Laptop + bring back to site	
0930	- Garrison Cont. Demo of Main Facility + Special Finishing bldgs, cont. application of water @ Demo locations	
1025	- Battery Replaced @ AMS-02, JA onsite to drop off laptop	
1036	- Battery Replaced @ AMS-03, JA offsite	

CAMP ACTIVITY LOG

Client Name:	Prologis	Weather:
Job/Site Name:	Former AB&I Foundry	Clear, sunny
Location:	7825 San Leandro Street Oakland, CA	
Project Number:	1793.0029S000	H: 76°F L: 56°F
Date:	9/11/23	
Field Staff:	Jesse Carlson - Staff Scientist (JC)	Wind: NE @ 9 mph

Time	Activity/Comments (i.e., Wind direction, dust readings, exceedances, response actions, mitigation, etc.)
1045	- Battery replaced @ AMS-01, 3-spent batteries placed on Charger, Demo + Haul off of debris cont. @ Main Facility + Special Finishing bldgs.
1130	- Crew breaks for lunch Demo paused
1200	- Work resumes, Garrison continues demo of Main facility + spraying water @ work zones
1220	- AMS-03 Battery Replaced - Demo Excavator moves to east side of main facility to continue demo. Spraying continued in both sides of facility
1335	- Phone call w/ RM to update on CAMP status (no exceedances at this time)
1430	- Demo work ends for the day, begin breakdown of CAMP equipment
1435	- Break down Camp equipment, JA onsite to assist
1520	- JC + JA offsite

CAMP ACTIVITY LOG

Client Name:	Prologis	Weather:
Job/Site Name:	Former AB&I Foundry	Cloudy 59 to 70°F, Westerly , NNE
Location:	7825 San Leandro Street Oakland, CA	
Project Number:	1793.0029S000	
Date:	09/12/23	H: 86°f.
Field Staff:	MG Ritter (MGR) - Staff Ecologist I, Roux / J. Garrison (JC) - Off Sci. I, Env.	
Time	Activity/Comments (i.e., Wind direction, dust readings, exceedances, response actions, mitigation, etc.)	
0600	- MGR & JC onsite. H&S tailgate. Begin setting up air monitoring stations (AMSs).	
0650	- All stations online. JC offsite. MGR discusses scope w/ Relando (foreman, Garrison): continue demolition of central portion of main facility and former special finishings building. off-haul/trucking of demo debris ongoing. AMS-05 is ole inaccessible for AM	
0700	- Garrison resumes demo/trucking.	
0750	- PMIC warning @ AMS-06. MGR speaks w/ crew about increasing dust control around main building. Concentrations return to normal	
0815	- AMS-07 set up directly next to AMS-04 as a contingency measure. AMS-04 does not appear to be reporting. Malfunctioning since 0700.	
0845	- Battery replaced at AMS-04. Appears to be back online. AMS-07 disconnected.	
0905	- AMS-04 not holding battery. Taken offline. AMS-07 replaces AMS-04.	
1015	- AMS-07 renamed "AMS-04" in system.	
1115	- Battery replaced at AMS-03. Issues reporting? No data since 0850.*	
1140	- Break for lunch. Work paused.	
1215	- Resume work. Connections undone/redone; station powered off at AMS-03; then restarted per EcoRentals. Back online/reporting. Demo of main building; former special finishings area ongoing.	
1355	- PMIC spike to >1000 $\mu\text{g}/\text{mg}$ at AMS-06 due to truck passing monitor. Garrison pauses work until 1405 to investigate spike. Prevailing wind direction makes AMS-06 an upwind station. Downwind stations did not spike. No exceedance. Resume work. concentrations return to normal.	
1430	- JC onsite. Garrison begins de-mobbing for day.	
1440	- Begin breaking down stations. Work complete for day.	
1510	- All stations offline & equipment stored in lockroom. MGR & JC offsite.	

AIR MONITORING STATION LOG

Client Name: Duke Realty Foundry LP
 Job/Site Name: AB&I Redevelopment
 Location: 7825 San Leandro Street, Oakland CA

Project Number: 1793.0029S000

Date: 09/12/23

Field Staff: MG RITTUR (MGR) - Staff Geologist I, P.E.
 J. CARLSON (JJC) - Staff Scientist I, P.E.

Notes: All AMSs/dusttrats calibrated w/ zero filter prior to first reading.

* Not reporting on environment (AMS-04). Adjusted connections. AMS-07 set up directly next to -04 as a contingency measure.

= Low battery. Battery replaced.

= AMS-05 is only inaccessible due to demolition work zones. Concentrations taken from environment.

CAMP ACTIVITY LOG

Client Name:	Prologis	Weather:
Job/Site Name:	Former AB&I Foundry	57-75°F, Partly Cloudy
Location:	7825 San Leandro Street Oakland, CA	W: NE to
Project Number:	1793.0029S000	H: 87%.
Date:	09/13/23	
Field Staff:	MG Rittner (MGR)-Staff Geo I, Roux / J. Carlson (JC)-Staff Sci I, Roux	
Time	Activity/Comments (i.e., Wind direction, dust readings, exceedances, response actions, mitigation, etc.)	
0600S	- MGR + JC onsite. Begin setting up air monitoring stations (AMSS).	
0650-	All stations online. Begin CAMP monitoring. MGR discusses scope for day w/ Rolando (Foreman, Garrison): continue demo of main building & load trucks w/ demo debris from special finishings area, south side of main building, and central portion of main building. *Wind direction alert active between 0630 ; 0703 (N to NNE).*	
0800-	wind direction alert active (N) until 0830. Active again between 0843 and 0903. Again 0903-0922.	
0900-	Demo of main building ongoing. No demolition activities in special finishings area.	
1035-	Battery replaced at AMSS-01. 1048 - Brief spike @ AMSS-01 due to truck passing.	
1130-	Break for lunch. Work paused. Brief spike @ 1120 @ AMSS-06 due to truck passing.	
1215-	Work resumes. ongoing demo in central portion of former main bldg.	
1300-	main building ^(MGR) Brief spike @ AMSS-06 due to truck passing monitor. No exceedance.	
1315-	wind direction alert active briefly. Battery replaced at AMSS-06.	
1344-	Battery replaced @ AMSS-01. Brief spike @ AMSS-06 due to truck passing.	
1410-	Demolition ongoing (main building). No demolition activities on ^{western} western portion of site. Off-hauling debris from eastern side of site.	
1430-	Demolition activities complete for day. JC onsite. Begin breaking down AMSS. CAMP monitoring complete for day.	
1505-	All stations broken down. MGR + JC offsite.

□ = Low battery. Battery replaced.

CAMP ACTIVITY LOG

Client Name:	Prologis	Weather:
Job/Site Name:	Former AB&I Foundry	57 - 73°F, Cloudy ^{MER} Foggy
Location:	7825 San Leandro Street Oakland, CA	N: NE 10°
Project Number:	1793.0029S000	H: 91%
Date:	09/14/23	
Field Staff:	MGR RITTER (MER - Staff Ecologist I, Roux) / J. Carlson (JC) - Staff Scientist I, Roux	
Time	Activity/Comments (i.e., Wind direction, dust readings, exceedances, response actions, mitigation, etc.)	
0610 -	MGR i JC onsite. Begin setting up air monitoring stations (AMSSs). Background concentrations reading ~40 mg/m³ or greater.	
0630 -	AMS-05 screen white. Not started. Wind direction alert (NE) active between 0630 & 0900.	
0650 -	All stations online. Screen functioning at AMS-05. MGR discusses scope w/ Rolando (Foreman, Garrison): continue demolition of former main building (east/central portion). Trucking/off-haul of demolition debris from east side of site (in the vicinity of AMS-06). JC offsite.	
0700 -	MGR to continue demo of main building. 2x trucks onsite. Brief spike at AMS-04 due to trucks passing before water truck sprayed path. AMS-04 moved ~50 ft SE along southern perimeter. Path sprayed w/ water. Concentrations return to background levels.	
0800 -	Battery replaced at AMS-02	
0825 -	Loose battery connection at AMS-03 causes station to go offline briefly. Back online @ 0830.	
0935 -	Brief spike up to 115 mg/m³ @ AMS-06 due to water truck spraying water towards monitor when passing. Concentrations then return to background levels.	
0957 -	Concentrations briefly spike at AMS-C4, -05, & -06 due to a large portion of the roof of the main building being torn down. Water hoses largely contain dust in central portion of site. No exceedance. Visible dust.	
1015 -	Hot work at former boghouse structure on north side of main building. Brief spike at AMS-04. Ongoing demo of main facility.	
1045 -	Clouds dissipate & background dust concentrations drop ^{by} ~10-20 mg/m³.	
1100 -	Battery replaced @ AMS-01.	
1130 -	Break for lunch. Work paused.	
1215 -	Resume demo work. Demo of former main facility & trucking ongoing. ^{MER}	
~1300 -	Large portion of main facility north corner collapses. Demo paused. Visible dust observed. Garrison pauses demo to investigate & spray water.	

CAMP ACTIVITY LOG

Client Name:	Prologis	Weather: (PM)
Job/Site Name:	Former AB&I Foundry	72°F, clear / hazy
Location:	7825 San Leandro Street Oakland, CA	W: WNW @ 12 mph
Project Number:	1793.0029S000	H: 65.7° F
Date:	09/14/23	
Field Staff:	MG ROUX (MGR) - Staff Geo I, Roux	
Time	Activity/Comments (i.e., Wind direction, dust readings, exceedances, response actions, mitigation, etc.)	
1320-	Dust suppressed. No exceedances. Garrison resumes demo. AMS-03 ^{offline} on site . Manual recordings taken. Station rebooted. Battery replaced. offline between 1313 & 1344.	
1345-	AMS-03 back online. Brief spike to 114 mg/m³ due to offsite traffic.	
1400-	wind speed increases. 12.7 mph. WNW.	
1422-	Brief spike at AMS-04 due to high winds and nearby demo activities. No exceedance.	
1430-	^{demo} work complete for day. Begin breaking down stations. CAMP monitoring complete for day. JC on site.	
1500-	All stations broken down. MGR + JC offsite.

CAMP ACTIVITY LOG

Client Name:	Prologis	Weather:
Job/Site Name:	Former AB&I Foundry	60 - 72°F, Cloudy
Location:	7825 San Leandro Street Oakland, CA	W: WNW
Project Number:	1793.0029S000	H: 80-1.
Date:	09/15/13	
Field Staff:	MG Ritter (MGR) - Staff Geologist I, Roux / J. Carlson (JC) - Staff Scientist I, Roux	

Time	Activity/Comments (i.e., Wind direction, dust readings, exceedances, response actions, mitigation, etc.)
0610	MGR + JC onsite. Begin setting up Air Monitoring stations (AMS)
0730	All stations online. Begin CAMP monitoring. MGR discusses scope for day w/ Rolando (Foreman, Garrison): continue demolition of main facility. off-haul of demolition debris from east side of site. Demo former core room & shipping area. ^{begin to}
0700	Garrison moves to ^{MP} resume demo of main facility. 2x haul trucks onsite.
0715	MGR moves AMS-04 ~ 50' SE along southern perimeter to be out of way of truck traffic. Two brief spikes at AMS-04 between 0700 & 0710 due to passing trucks.
0930	Ongoing demo of main facility and trucking. AMS-04 offline briefly between 0924 & 0930. Back online. appears to have been user network malfunction.
1010	Brief spike at AMS-02 to $150 \mu\text{g}/\text{m}^3$. Appears to have been from an offsite source. Monitor is directly adjacent to highway ramp.* Concentrations quickly return to background. No work activities in the vicinity of AMS-02. * visible dust obscured and sounds like a leaf blower being used.
1130	Break for lunch. Demo paused.
1215	Resume work. MGR to continue demo of main facility. Water truck sprays truck path.
1125	Brief spike at AMS-C3 to $\sim 100 \mu\text{g}/\text{m}^3$. No site work in the vicinity of the monitor. Appears to have been caused by offsite traffic.
1400	Demo & truck loading in vicinity of former core room and shipping storage area.
1435	Demo activities complete for day. Begin breaking down CAMP stations
1515	All stations offline & broken down. MGR offsite.

□ = low battery. Battery replaced.

* AMS-06 briefly offline between 0924 & 0930 due to network malfunction.

PROJECT NO.:	1793.0029S	CLIENT:	DATE:	September 11, 2023
PROJECT:	Former AB&I Foundry CAMP	Prologis	WEATHER:	55-77°F, Clear, W: NE, H: 55%
LOCATION:	7825 San Leandro Street, Oakland, CA		TIME:	0600 – 1530
CONTRACTOR AND EQUIPMENT		PERSONNEL PRESENT AT SITE AND AFFILIATION:		
<ul style="list-style-type: none"> Garrison Demolition Engineering (3x excavators) 		<ul style="list-style-type: none"> Jessica Aguayo (Field Staff) – Roux Jesse Carlson (Field Staff) —Roux Alberto Marquez (Superintendent) – Garrison Rolando (Foreman) – Garrison 		

OBSERVATIONS, DISCUSSIONS, ETC.

Roux was onsite to implement Community Air Monitoring Plan (CAMP).

GENERAL COMMENTS:**Description of demolition activities performed:**

- Demolition of the former Special Finishing area, and catwalk along the northwest and southeast portions of the main building; and
- Trucking/off-haul of stockpiled demolition debris.

CAMP Implementation:

- CAMP was implemented from 0700 to 1445. Six CAMP stations (each consisting of a particulate meter) and one meteorological station were set-up as described in the CAMP and Shown on Figure 1.

Action Level exceedances:

- None

Response actions/mitigation measures:

- None

Community complaints received:

- None

Upcoming work activities anticipated:

- Continue demolition in the vicinity of the former Special Finishing Area and casing storage area on the northwest portion of the Site. Continue demolition of the catwalk on the northwest and southeast portions of the former main building. Off-haul of stockpiled demolition debris.

OBSERVATIONS, DISCUSSIONS, ETC.

Roux was onsite to implement Community Air Monitoring plan (CAMP).

GENERAL COMMENTS:**Description of demolition activities performed:**

- Demolition of the former special finishing area and central portion of the main building; and
- Trucking/off-haul of stockpiled demolition debris from the special finishing area, south side of main building, and central portion of main building.

CAMP Implementation:

- CAMP was implemented from 0700 to 1445. Six CAMP stations (each consisting of a particulate meter) and one meteorological station were set-up as described in the CAMP and Shown on Figure 1.

Action Level exceedances:

- None

Response actions/mitigation measures:

- Work paused between 1355 and 1405 to investigate a potential exceedance at AMS-06. Instantaneous spike in PM10 was presumably caused by a truck moving in the immediate vicinity of the monitor. Due to the upwind location of the monitor, no exceedance occurred; however, trucks were asked to slow down and more water was sprayed in the work zone/trucking zone.

Community complaints received:

- None

Upcoming work activities anticipated:

- Continue demolition of the special finishing area and main building. Off-haul of stockpiled demolition debris.
